Bekaert Specialty Films, LLC is ISO 9001:2008 and ISO 14001:2004 certified

Panorama® Slate

The Dual-Reflective Panorama® Slate Series offer exceptional solar rejection performance with a more neutral finish. These films maintain views with reduced interior and exterior reflectance, while increasing privacy by day. This series offers an attractive complement to building aesthetics and efficiency. The Slate series maintains minimal nighttime reflectivity for an uncompromised view day or night. Panorama® Slate films are ideal for applications where glare is a primary consideration. Panorama® Slate films include:

Slate 10 Window Film

Offers you optimum heat and glare reduction, added privacy, and softened natural lighting. This film is neutrally tinted, hardly noticeable from the inside with a reflective finish outside.

Slate 20 Window Film

Offers you optimum heat and glare reduction, added privacy, and adequate natural lighting. This film is neutrally tinted, hardly noticeable from the inside with a reflective finish outside.

Slate 30 Window Film

Offers you substantial heat and glare reduction, added privacy, and adequate natural light. This film is lightly tinted, hardly noticeable from inside with a subtle, reflective finish outside.

Slate 40 Window Film

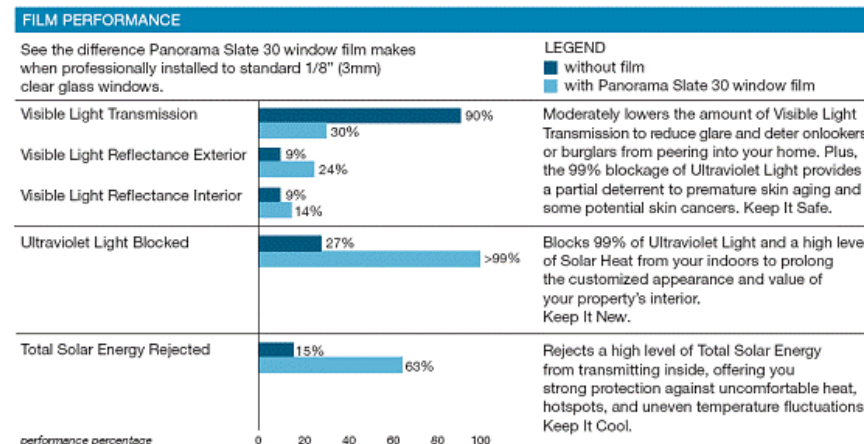

Offers you substantial heat and glare reduction, added privacy, and adequate natural light. This film is lightly tinted, hardly noticeable from inside with a subtle, reflective finish outside.

Slate 50 Window Film

Offers you substantial heat and glare reduction, added privacy, and adequate natural light. This film is lightly tinted, hardly noticeable from the inside with a subtle reflective finish outside.

Panorama® Autumn Bronze

Autumn Bronze is also a dual reflective film, but contains a layer of copper. The result is a soft, light-golden film that rejects 66% of the total solar energy and has a visible light transmission of 34%. It is ideal for applications with a high glare factor that also require minimal night time reflectivity. It is also used to improve the appearance of buildings with a brick façade.
